Activities are subject to change. Indoor visitations are scheduled on our web site based on current state recommendations. Please wash hands regularly and cover your cough.

DID YOU KNOW??? Grapes light on fire in the microwave???

DO NOT TRY THIS AT HOME

They found that **grapes**—either one split in half or two touching—can concentrate the energy of the **microwave** into two “hotspots.” When the hotspots touch, they create a plasma, or an ionized gas which emits **light** and heat. The size of the **grapes**, it turns out, are the key to this kitchen science quirk. **YIKES!** (Why would you want a hot grape...)

Did you Know??? McDonald's once created bubblegum-flavored broccoli???

McDonald's is always introducing new items for their loyal customers. Obviously, some are more successful than others. But their **bubblegum-flavored broccoli**, which the fast-food chain developed in 2014 as a tastier version of the leafy green for children, was a complete failure. McDonald's CEO **Don Thompson** admitted that kids were confused by the taste.

+

What do you think?

Did you Know??? Bubble wrap was originally invented as wallpaper!

They **invented bubble wrap** while trying to create a textured wallpaper by sealing two shower curtains together to trap air bubbles. **Let's Pop the wall!**

Vaccination Day at Laurel Place! YAY!
